⁽¹⁾ Each month small revisions to figures may have been made since the previous press release. This reflects additional information received.

⁽²⁾ Industry funds under management includes money invested in the underlying funds in which funds of funds invest, but excludes money invested in funds of funds themselves (other then funds of overseas funds) to avoid double-counting.

⁽³⁾ These figures include double-counting of investments through FOFs - assets are counted first when invested in a FOF and then when FOF invests in other funds. This gives the best indicator available of the asset breakdown of investors' choices since the Investment Association cannot identify FOFs holdings of funds. Asset types (Equity, Fixed Income, etc) are defined in terms of the Investment Association sectors included. See Table 6 for a listing of the Investment Association sectors allocated to each asset class.

⁽⁴⁾ From March 2014, the FUM of mixed asset funds is reduced and the FUM of other funds is increased due to funds re-classified from the Investment Association Mixed Asset sectors to the Investment Association

⁽⁵⁾ Prior to January 2012 data is presented according to FUM in UK Domiciled funds.
